

HARI PRASANTH V

Software Engineer — React.js | Next.js | Python FastAPI | TypeScript

Tiruppur, Tamil Nadu, India | +91 82709 89679 | hari.prasanth.v.dev@gmail.com | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

Notice Period: Immediate / 15 Days | Open to: Bangalore, Chennai, Hyderabad, Coimbatore, Remote

PROFESSIONAL SUMMARY

Full-stack Software Engineer with 2+ years of production experience shipping revenue-facing web platforms across Real Estate, ERP/B2B Commerce, Healthcare, and CMS. Deployed via ApplogiQ on Time4Digital's (Luxembourg) client portfolio — deliver 5+ live enterprise sites — while owning internal ApplogiQ enterprise systems end-to-end, from architecture to deployment. Core strength: React.js, Next.js (App Router), TypeScript, and Python FastAPI, backed by AI-accelerated engineering workflows (Cursor AI) that cut build time by ~30% without compromising code quality.

TECHNICAL SKILLS

Frontend: React.js, Next.js (App Router, SSR), TypeScript, JavaScript (ES6+), HTML5, CSS3

Styling & UI: Tailwind CSS, Bootstrap 5, Responsive Design, Mobile-First UI/UX

Backend & CMS: Python (FastAPI), Contao CMS, REST API Design, PostgreSQL, Firebase

State Management: TanStack Query (React Query), Redux Toolkit, Context API

Tooling & DevOps: Git, GitHub Actions, Vite, Webpack, Postman, Vercel, Cursor AI (prompt engineering & code scaffolding)

Engineering Practice: Component-Based Architecture, Performance Optimization, Multi-Project Delivery, DOM Virtualization

PROFESSIONAL EXPERIENCE

Software Engineer | Time4Digital (Luxembourg)

Deployed via ApplogiQ | Remote — Tiruppur, India | Feb 2026 – Present

- Deliver and maintain **5 live enterprise client platforms** (TS-Concept, Luxambulance, Lumina, Modetreff, Kabemewa) for the Luxembourg-based agency, spanning architecture, emergency medical transport, and consumer retail sectors.
- Build and customize **Contao CMS** platforms — modular layouts, forms, and service catalogs — tailored to European enterprise and consumer markets.
- Architected TS-Concept (architectural/interior services portal) and Luxambulance (emergency medical transport portal) with responsive service modules and validated contact/booking workflows for sector-specific user journeys.

Software Engineer | ApplogiQ

Tiruppur, India | Jul 2024 – Present

- Concurrently manage **multi-stream production workloads**, delivering internal enterprise applications (ApplogiQ Admin Panel, Planora) alongside client engagements.
- Architect modular, high-performance frontends in **React.js, Next.js, and Tailwind CSS**, improving page render performance and UI development velocity by ~30%.
- Build **Python FastAPI** backend services powering authentication, dynamic forms, and real-time dashboard data flows across multiple products.
- Use **Cursor AI** to scaffold and refactor parallel codebases, enabling consistent daily feature delivery across concurrent frontend and backend pipelines.

KEY CLIENT & ENTERPRISE PROJECTS

TerraVista — Luxury Real Estate Platform | React.js, HTML5, CSS3, Bootstrap

Live: terravistahome.com

- Built a luxury home builder platform for a real estate client, featuring dynamic service modules, architectural portfolio showcases, and consultation booking workflows that drive qualified lead capture.
- Delivered a responsive, conversion-focused UI aligned to premium brand positioning, directly supporting the client's sales funnel.

Crayoon — B2B Uniform Commerce & ERP Platform | Next.js, React.js, Python FastAPI, PostgreSQL

- Built a B2B eCommerce and enterprise operations platform managing multi-client uniform orders, size allocations, and real-time inventory tracking via FastAPI REST endpoints.

- Designed the PostgreSQL data layer and order-management workflows to handle concurrent multi-client transactions at production scale.

Vigilance — GDPR-Compliant Property Risk Assessment Platform | *React.js, Python FastAPI, Bootstrap, REST APIs*

- Built a GDPR-compliant, tablet/mobile-optimized field inspection app for property security and CCTV risk assessments, cutting large-dataset load times by ~40% via DOM virtualization.
- Implemented data-handling workflows aligned to GDPR compliance requirements for client-facing risk reporting.

Evalia — Secure Property Verification & Wealth Automation Platform | *Python, Selenium, React.js, REST APIs*

- Engineered an automated Selenium-based verification pipeline extracting and validating buyer financial records from Chilean government portals via National Tax IDs (RUT/RUN).
- Built a secure internal dashboard structuring verified wealth data into actionable lead tables, accelerating buyer qualification for real estate sales teams.

Additional Shipped Deliverables

- **ShopQ** (shopq.online) — SaaS e-commerce landing platform. *Dec 2024 – Mar 2025*
- **LeadSynQ** (leadsynq.com) — Automated CRM & lead-tracking portal. *Sep 2024 – Dec 2024*
- **Tecosoft** (tecsoft.ai) — IIoT and Industry 4.0 landing platform.
- **Ayushya AI** (ayushyaai.com) — Healthcare symptom-logging interface.

EDUCATION & CERTIFICATIONS

B.B.A. with Computer Applications — RVS College of Arts and Science (2021 – 2024)

Full Stack Web Developer Certification — SkillVertex (2023)
